dear dept. of energy, i am writing to urge you to not approve yucca mountain, nevada as a site for storage of high-level nuclear waste - we had an accident in st. louis in may when a freight train derailed, spilling the contents of 13 coal cars in a family neighborhood - thank goodness there was no nuclear waste onboard - in view of the danger of terrorist attach, human error and accidents, please leave the nuclear waste where they originate - no to the yucca mountain waste site - thank you
- mary mcmahon , st. louis, mo
