Part of Records Package / Supplement / Correction

Since we have not yet learned how to safely dispose of nuclear waste, let us not compound the problem by moving it. Accidents do happen and so do acts of terrorism. Last May, a freight train derailed in small-town Webster Groves, spilling the contents of 23 coal cars onto Lockwood Avenue-a prime family neighborhood. Let the waste stay where it was manufactured that should be part of their money making contract. You are to serve the interests of the American people, not the money interests that contribute to your campaign funds. You have taken from this country for too many years, it is time to do the right thing.
