Comments: You people are out of your mind to further destroy the most pristine state in the union.

Don't tell me....your from California. Put it in the Mojave Desert.

Why not place your project there?

I moved to Nevada because I want to take part in keeping it free and non-dictatorial. I guess no one cares about the future of mankind. No one has learned from the testing in Nevada from earlier years.

Nevada will not be the dumping ground of the future.

Shame shame shame on whoever recommended Nevada.
