Comments: (If possible, please reference section and/or page number in document if applicable.)

10/10/01-Amargosa; statement by Sally Devlin of Pahrump that we would lose the "highly radioactive rods" in the event of a truck accident was patently false.

I have observed WIPP trucks in Utah and New Mexico, very impressive, obviously extremely safe. They do not damage the narrow, thin roads in northern New Mexico, especially the route from Los Alamos National Lab down the Mountain.
