Subject: Yucca Mountain Is the Preferred Site for Nuclear Waste Storage

Part of Records Package / Supplement / Correction

I urge the Department of Energy to recommend the Yucca Mountain site to the president as a suitable repository for nuclear waste. Many scientific studies support the fact that the site is geologically stable. The DOE, by law, was supposed to begin accepting waste in 1998. Consumers have paid several billion dollars by way of surcharges on their electricity bills for this to happen. And it is much much safer to store spent nuclear fuel in one controlled location than in the spent fuel pools of the 103 operating nuclear plants all across the country.

Let's get this done!
