17 MS. KRAMBS: My name is Betty Krambs,
18 K-R-A-M-B-S. And I strenuously object to the use that
19 they are putting Yucca Mountain to.

20 I feel as many brains as we have in this
21 country, all the money that we have spent in Yucca
22 Mountain in harnessing it to use, as a practical thing it
23 would probably have been much cheaper power now and
24 wouldn't have the shortage of power we have now.

1 That's it. That's what I feel and for whatever
2 it's worth.
