RE: Yucca Mountain Preliminary Site Suitability Evaluation

Dear Carol Hanlon,

I write to you today to ask how the DOE can recommend going forward with Yucca Mountain when the potentially catastrophic impacts of high-level nuclear waste transportation have not been addressed. It does not make sense to bury atomic waste into an active earthquake zone that leaks water like a sieve into a drinking water supply.

I look forward to hearing from you on how the DOE can possibly justify dumping high-level nuclear waste at this site.

I thank you very much for your time.

Sincerely,

Sarah Webber
